

QUICK-LOCK

POST SYSTEM

Introducing the latest innovation in temporary signage for urban and 12D streetwork schemes.

Combining our **ENVIRO-PLATE** substrate with a hi-visibility 60mm x 60mm yellow pvc slotted post and heavy duty, 19kg pvc base creates a fully recyclable unit, manufactured from re-ground materials, which benefits the environment as much as it does road safety.

Specification:

- 4mm thick 100% recyclable panels
- Up to 750mm Triangles and Circles
- Up to 1050mm x 750mm Rectangles
- 1000mm & 1500mm long post options
- Heavy duty pvc Euro Base - 790mm x 390mm, weighing 19kgs manufactured from recycled materials

Benefits & Options:

- Unique **QUICK-LOCK** panel fixing system
- Easy to deploy providing stable display
- Double stack ballast option for extreme wind conditions
- Unlimited number of uses of base and post compared to frames
- Smaller footprint on carriageway
- 9kg weight saving per sign compared to metal frames, leading to fewer vehicles being used per scheme
- Vertically fixed sign faces for improved visibility

Deploying the **QUICK-LOCK** is as easy as:

← → POST SYSTEM

1. Position base-plate ballast at desired location

- No need for sand-bags
- Easy to carry handles
- Minimal footprint (reduced trip hazard)

2. Locate post into base-plate ballast

- No fixings or locking mechanism necessary
- Easy to handle, lightweight post (1.4kgs for 1500mm version)

3. Attach sign plates to post

- Sign plates supplied with pre-fitted lugs
- Engineered keyhole fixings in posts
- Simple drop and lock process
